

RE·BL™

New IR to Bluetooth
converter for the PS3

for full Blu-ray/DVD playback control

Bridge the gap

Besides being a great gaming console, the PS3 is also a fantastic Blu-ray player. It has one major draw-back; your all-in-one remote is useless to control it. That is until now.

The PS3 is controlled only by Bluetooth, but all universal remotes use IR (infrared). This is a problem every PS3 user will face when trying to control their console with any universal remote. The Blu-ray format is the future of high definition media and the PS3 is one of the best Blu-ray players on the market.

RE•BL is the solution that bridges the gap between any universal remote and PS3.

The innovative and unique design makes the RE•BL look good in any home entertainment system but also supports external IR sensors for concealed setups.

Simply pair the compact and sleek device with your PS3, and configure your universal remote and you have complete control of Blu-ray/DVD playback.

Multiple power sources, including battery, USB and DC adapter are supported, and the unit will automatically enter low power mode when not used to conserve energy and to maximize battery lifetime.

For those looking to maximize control, the RE•BL offers advanced configuration options by the accompanying PC-software, through the built-in USB 2.0 port.

The RE•BL puts uncompromised control back where it belongs, comfortably at your finger tips.

Key features:

- Full Blu-ray/DVD playback control of PS3
- Power on/off control of PS3
- Support for external IR receiver and IR distribution systems
- Supports multiple power sources: DC, USB or battery
- Low power mode for extended battery life
- Low battery indicator
- Activity LED for user feedback
- Easy battery-change by removing two o-rings, no screwdriver needed
- Power state sensing of PS3 via USB connector
- Fully firmware upgradeable
- Driverless USB connection for advanced configuration through PC-software
- Innovative casing design allows for easy change of batteries and flexible placement options leaving a small footprint

Designed and manufactured in Denmark
